

**Adolfo L. Gomez**  
Vice President, Scientific Affairs

---

---

## Background and Experience

---

---

With over 15 years industrial experience, Mr. Gomez offers extensive technical insight into various business sectors including: Sterile Manufacturing, Ethical, Generic and OTC Drugs as well as Nutritional and Herbal/Botanical Supplements. Adolfo has held positions in Quality Control, Technical Services, Validation and Research and Development, with increasing levels of responsibility, including Senior Scientist, Group Leader, Manager and Director. Major accomplishments include the design of validation master plans, template creation of master batch records, design and implementation of product development project management systems, start up of a GMP pilot facility and development of traditional and novel formulations. Many of the formulations developed by Mr. Gomez have been successfully commercialized. Adolfo has been instrumental in the successful technical transfer of new products into manufacturing plants both internationally and domestically.

Mr. Gomez holds a Bachelor of Science in Biochemistry from Rutgers University and a Master of Science in Pharmaceutics from Long Island University. He has presented research papers for the American Society for Microbiologists and the American Association of Pharmaceutical Scientists.

Adolfo's work history includes tenures at Lederle Laboratories, Wyeth Pharmaceuticals, Barr Laboratories, Granutec Inc., and Novopharm. Mr Gomez is a founding principal of *I.D.E.A.S., Inc.* During his tenure at *Emerson*, Adolfo has been involved with novel formulation design, technical training program development, execution of scale-up feasibility trials, process validation, process troubleshooting and development of project management systems.

Mr. Gomez is a member of the American Association of Pharmaceutical Scientists and the Asociacion Farmaceutica Mexicana.

Emerson Resources, Inc. is an organization servicing the pharmaceutical and nutritional supplement industries. The company has three areas of focus: Formulation development and technical support (Emerson Pharma Services), Technical training (Emerson Science Center) and Value added ingredient supply (Emerson Ingredient Technology).
