

Aaron Barkley

Manager, Contract Services

Background and Experience

Aaron Barkley holds a Bachelor of Science degree in Biology from Waynesburg College. Aaron has been actively involved in the pharmaceutical industry and has played a critical role in the function and growth of two product development laboratories.

Prior to his employment with Emerson, Aaron was employed by Monsanto Pharmaceutical Ingredients, and was responsible for new product development and generation of intellectual property for patents related to novel solid dose delivery systems, and value-added ingredients.

Aaron has been with Emerson Pharma Services since its inception in 2000. He has held positions including formulation scientist, senior formulation scientist and group leader. As contact services manager, at Emerson, Aaron is actively involved in all phases of product development, process engineering, project management and customer service. His work has led to the development and marketing of several novel delivery systems in the pharmaceutical, nutraceutical and food industries. Aaron has worked in all phases of product development, technical transfer, scale-up and manufacturing, and has gained valuable experience with process optimization and introduction of new and existing production technologies and practices.

Aaron is a member of The American Association of Pharmaceutical Scientists and the New Jersey Pharmaceutical Alliance of Science and Technology.
